Technology

Florida is home to many leading high-tech companies and is positioned to become a dominant force in the life sciences as well. Ruden McClosky attorneys serve clients in many sectors of this vibrant technology economy, providing services ranging from assistance in securing venture capital, to corporate formation or reorganization, to intellectual property protection, among others. As a full-service Florida law firm with 11 offices throughout our state, we are poised to serve entrepreneurs, corporations, research institutes and other entities that comprise the many sectors of the technology industry including:

- Software and computer systems design and integration
- Photonics and optics
- Modeling, simulation and training (MST)
- Telecommunications
- Digital MediaComputers, microelectronics and precision device manufacturing
- Biotechnology

Please see our [Intellectual Property Practice](#) for more information about our capabilities and services.
